Product Overview

Professional 12L Constant Temperature Water Heater

This 12L constant temperature water heater is designed for reliable, efficient performance in residential or commercial settings. It features advanced smart staged combustion technology paired with an oxygen-free copper heat exchanger for optimal thermal conductivity and durability. With its intuitive digital interface, users can easily monitor and adjust water temperature settings for precise control and consistent comfort.

Technical Specifications

Capacity	12 L
Dimensions	540 x 348 x 128 mm
Weight	10 kg

Key Features

Interface Capabilities

- Digital temperature display
- Adjustable temperature controls
- Power status indicator
- Winter mode functionality
- Shower mode indicator

Core Technologies

Digital Constant Temperature, Smart Staged Combustion, Oxygen Free Copper Heat Exchanger
