Product Overview

High-Efficiency T8 LED Tube Solution

This 1.2m T8 LED tube provides a robust and energy-efficient replacement for traditional fluorescent lighting. Utilizing advanced glass nano-powder coating technology and high-efficiency chips, it ensures uniform light distribution and superior thermal management. Designed with an IC constant current driver for over-voltage protection, this product is ideal for large-scale professional applications including factories, supermarkets, and warehouses.

Technical Performance

Key Performance Metrics

18 W Power Rating	1800 LM Luminous Flux	25000 H Lifespan
-----------------------------	---------------------------------	----------------------------

Color Temperature

- 3000K
- 4000K
- 6500K

Input Voltage	170-265V
Beam Angle	120 degrees

Physical Specifications

Length Options	0.6M, 1.2M
Base Type	G13
Housing Material	Glass
