

12mm Component Feeder for SMT Placement Machines

This 12mm feeder is designed for use with TCM1000, TCM2000, and TCM3000 series machinery. It delivers components with precision and reliability for optimal performance in automated assembly processes.

Product Overview

High-Precision Component Feeder

This 12mm component feeder is engineered for seamless integration with high-speed SMT placement machinery. Designed to deliver components with exceptional precision and reliability, it supports optimized automated assembly processes. Its robust construction ensures long-term operational durability and minimal maintenance requirements for demanding production environments.

Technical Specifications

Supported Feeder Sizes

- 8
- 12
- 16
- 24
- 32
- 44
- 56
- 72

Feeder Width	12 mm
Compatible Series	TCM1000, TCM2000, TCM3000
Construction Type	Embossed
