

12mm Electric Wood Router for Woodworking

This 12mm electric wood router is a versatile power tool designed for woodworking and routing tasks. It features a robust motor for smooth cutting, adjustable depth settings for precision, and a comfortable grip for enhanced control.

Overview

Precision Woodworking Power Tool

This 12mm electric router is a versatile power tool engineered for professional woodworking and intricate routing applications. It features a robust motor designed for smooth, efficient cutting performance across wood, plastic, and similar materials. With its adjustable depth settings and ergonomic grip, users can achieve precise results for decorative edges, grooves, and complex designs.

Technical Specifications

Collet Capacity	12 mm
Compatible Materials	Wood, Plastic

Features

Core Capabilities

- Adjustable depth settings for precision
- Robust motor for efficient cutting
- Ergonomic grip for enhanced control
- Compact design for maneuverability

Recommended Use

Professional • DIY
