

12mm Feeder for FUJI NXT SMT Placement Machines

This 12mm feeder is designed for FUJI NXT series SMT placement machines. It ensures accurate and reliable component feeding for high-speed electronic assembly.

Product Overview

Precision 12mm SMT Feeder Unit

This 12mm feeder unit is engineered for high-precision component placement in SMT assembly environments. Designed for seamless integration, it ensures reliable and accurate feeding to maximize production efficiency and minimize operational downtime. This unit, identified by model code KT12A 002843, serves as a critical component for maintaining high-speed electronic assembly workflows.

Technical Specifications

Feeder Width	12 mm
Model Identifier	KT12A 002843

Compatibility & Variants

Available Spare Parts & Accessories

- Feeder Motor
- Control Board
- Power Cord
- Trolley
- Calibration Tool

Supported Feeder Widths	8mm, 12mm, 16mm, 24mm, 32mm, 44mm, 56mm, 72mm, 88mm
