

12mm SMT Component Feeder

This 12mm SMT component feeder is designed for automated component placement systems. It provides reliable and accurate feeding of 12mm wide components.

Product Overview

High-Precision SMT Component Feeder

The 12mm SMT component feeder is a high-performance unit engineered for automated component placement systems. It provides reliable and precise indexing for 12mm wide components to ensure seamless high-speed operation. Designed for durability and accuracy, this feeder is an essential component for high-volume electronic assembly applications.

Technical Specifications

Component Width	12 mm
Compatibility Series	CL Series, FV Series, YV Series

Service & Support

Available Maintenance Services

- Industrial PC board repair
- Electronic controls repair
- SMT feeder calibration
- Industrial camera and laser repair
- Servo driver and motor repair
- Power supply and circuit board servicing
