

12V 100Ah Lead-Acid Starter Battery

This is a 12V 100Ah lead-acid starter battery. It is designed to meet Japan Standard specifications and provide reliable starting power for automotive applications.

Product Overview

Professional Starting Power

This 12V 100Ah lead-acid battery is engineered for reliable starting performance in demanding maritime and offshore applications. Designed for low-maintenance operation, it features advanced liquid charge technology that eliminates the need for water or acid supplements. Its robust construction ensures long service life, high safety, and low self-discharge for consistent power delivery.

Technical Specifications

| | |
|------------------------|--------------------|
| Voltage | 12 V |
| Capacity (C20hr) | 100 Ah |
| Dimensions (L x W x H) | 407 x 171 x 226 mm |

Performance Features

Key Performance Attributes

- Strong starting ability
- Low self-discharge
- Low water consumption
- Maintenance-free operation
- High safety rating

Applications

| | |
|----------------------|---|
| Primary Applications | Maritime, Offshore Platforms, Internal Combustion Engines |
