

12V 100Ah Sealed Lead-Acid Battery for UPS

This 12V 100Ah valve-regulated sealed lead-acid battery is designed for UPS applications. It provides reliable power backup and long service life.

Product Overview

Reliable UPS Backup Power

The 6-GFM-100 is a high-performance, valve-regulated sealed lead-acid battery engineered for critical power applications. This 12V 100Ah unit provides dependable backup energy for uninterruptible power supplies and emergency lighting systems. Designed for safety and longevity, the battery features a spill-proof, maintenance-free construction to ensure efficient operation in demanding professional environments.

Technical Specifications

Rated Voltage	12 V
Rated Capacity	100 Ah
Battery Technology	VRLA, Sealed Lead-Acid, Valve Regulated

Operational Features

Safety Design

Spill-proof • Valve Regulated

Maintenance Requirements

Maintenance-free

Applications

Primary Applications

- Uninterruptible Power Supplies (UPS)
- Emergency Lighting Systems
- Critical Power Systems
