

12V 100Ah UPS Battery

This valve-regulated lead-acid battery is designed for UPS applications. The 12V 100Ah battery is sealed and maintenance-free, providing reliable power for uninterrupted operation of critical systems.

Product Overview

Reliable Power Backup Solution

This Valve Regulated Lead-Acid (VRLA) battery is engineered for critical UPS applications where uninterrupted power is essential. With a robust 12V 100Ah configuration, it ensures stable and consistent energy delivery for high-demand systems. Its sealed, maintenance-free design promotes ease of use and longevity in diverse professional environments.

Technical Specifications

Maintenance

Sealed • Maintenance-free

Nominal Voltage

12 V

Nominal Capacity

100 Ah

Technology

Valve Regulated Lead-Acid (VRLA)

Compliance and Standards

Model ID

6-GFM-100

Key Features

Valve Regulated, UPS Application, Long Service Life, Robust Construction
