

12V 105Ah Automotive Battery

This 12V 105Ah automotive battery features robust construction and high starting power. It is designed to ensure reliable performance and long-lasting durability for various vehicle applications.

Overview

High-Performance Automotive Power

This 12V 105Ah automotive battery is engineered for reliability and high starting power in demanding vehicle applications. Built with advanced technology, it delivers consistent performance and long-lasting durability. It is a trusted solution for professional automotive needs, backed by international quality certifications.

Technical Specifications

Voltage	12 V
Capacity	105 Ah
Model Code	105E41R

Features & Quality

Key Features

High Starting Power • Japan Technology • Robust Construction

Certifications	ISO 9001, TS 16949
----------------	--------------------

Maintenance

Electrolyte Level Indicators

- Upper Level Indicator
- Lower Level Indicator
