

12V 105Ah Deep Cycle Battery for Electric Vehicles

This 12V 105Ah deep cycle battery is designed for electric vehicles, offering a long cruising range. The battery features maintenance-free operation and provides reliable power with an extended lifespan.

Overview

High-Performance Deep Cycle Battery

This 12V 105Ah deep cycle battery utilizes advanced absorbent glass mat (AGM) technology to deliver maintenance-free operation and efficient gas recombination. Engineered for versatility, it is suitable for a wide range of electric vehicles, including electric cars, buses, and sightseeing carts. With a focus on durability, it features a special rare earth alloy formula to enhance grid corrosion resistance and ensure a long service life.

Key Features

Performance Benefits

Maintenance-Free • High Temperature Performance • Low Self-Discharge • Fast Charging • Environmental Friendly

Application Scope

Electric Cars, Hybrid Cars, Electric Buses, Sightseeing Vehicles, Golf Carts, Children's Electric Vehicles, Garbage Trucks, Patrol Cars

Technical Specifications

Electrical Metrics

12 V Nominal Voltage	105 Ah Nominal Capacity	15.8 A Max Charge Current
--------------------------------	-----------------------------------	-------------------------------------

Rated Capacity by Discharge Rate

Rate	Capacity
10 Hour Rate	122.0 Ah
3 Hour Rate	105.0 Ah
1 Hour Rate	82.9 Ah

Dimensions

- Length: 330 mm
- Width: 172 mm
- Height: 214 mm
- Total Height: 214 mm

Weight	33.5 kg
Container Material	ABS
Design Life	5 years

Operating Conditions

Operating Temperature	-20°C to 50°C
Float Use Voltage	13.7-13.9V @ 25°C
Cycle Use Voltage	14.7-14.9V @ 25°C
