

# 12V 12Ah Electric Scooter Battery

This 12V 12Ah battery is designed for electric scooters and similar applications. It delivers consistent power, ensuring optimal performance and a long lifespan for electric vehicles.

## Product Overview

### High-Performance Electric Mobility Power

The 6-DZM-12 is a specialized 12V 12Ah battery engineered for electric vehicles, including scooters, tricycles, and golf carts. Utilizing advanced NanoGel technology and a high-tin alloy grid, this battery offers exceptional charge acceptance, low self-discharge, and robust anti-vibration capabilities. Its maintenance-free, leak-proof design ensures reliable power delivery and an extended service life for demanding road applications.

## Technical Specifications

Voltage	12 V
Capacity	12 Ah
Model Number	6-DZM-12

## Key Features

### Performance Metrics

**100 %**

Recyclability

### Operational Benefits

- NanoGel Technology
- High anti-vibrate ability
- Low self-discharge
- Excellent charge acceptance
- Leak-proof design
- Deepen-thread terminal

### Construction Materials

Pb-Ca Alloy, High Tin Alloy, Copper Core Terminal

## Applications

### Primary Applications

Electric Scooters • Electric Tricycles • Golf Carts • Sightseeing Cars • Electric Road Vehicles
