

12V 135Ah Automotive Lead-Acid Battery

This automotive lead-acid battery provides 12V power with a 135Ah capacity. It is designed for starting, lighting, and ignition (SLI) applications in vehicles.

Product Overview

High-Performance Automotive Battery

This 12V 135Ah lead-acid battery is engineered for reliable starting, lighting, and ignition (SLI) applications in heavy-duty vehicles. Designed with robust construction, it ensures consistent power delivery and durability under demanding automotive conditions. It serves as a dependable energy source for essential vehicle operations.

Technical Specifications

Rated Voltage	12 V
Rated Capacity	135 Ah
Model Code	6-QA-135
Primary Use	Starting, Lighting, Ignition, Automotive
