

# 12V 150Ah Automotive Lead-Acid Battery

This automotive lead-acid battery has a 12V voltage and 150Ah capacity. It is designed for starting, lighting, and ignition (SLI) applications in vehicles.

## Overview

### Reliable Starting Power

This 12V 150Ah lead-acid battery is engineered for demanding starting, lighting, and ignition (SLI) applications. Designed with a focus on durability, it features robust construction that ensures excellent vibration resistance and an extended service life. It serves as a dependable power solution for a wide range of automotive and industrial vehicles.

## Technical Specifications

Rated Voltage	12 V
Capacity	150 Ah
Primary Applications	Starting, Lighting, Ignition, Automotive, Industrial

## Key Features

### Performance Highlights

**12 V**  
Voltage

**150 Ah**  
Capacity

### Design Advantages

- Robust construction for enhanced durability
- High resistance to vibration
- Extended service life for reliable operation
