

12V 150Ah Automotive Starter Battery

This 12V 150Ah lead-acid starter battery is designed to meet the Japan Standard. The maintenance-free battery is engineered for reliable starting power and long-lasting performance in automotive applications.

Product Overview

High-Performance Starting Battery

This 12V 150Ah automotive starter battery is designed for reliability and ease of use in heavy-duty applications. It features a maintenance-free design that eliminates the need for acid supplementation or water refills during its service life. Built for consistent starting power, it provides a stable electrical supply for ignition, lighting, and starting systems in a variety of internal combustion engines.

Technical Specifications

Core Capacity

12 V

Voltage

150 Ah

Capacity (C20hr)

Physical Dimensions

Dimension	Value (mm)
Length	508
Width	220
Height	235

Features and Compliance

Maintenance Level

Maintenance-Free • Liquid Charged

Key Performance Attributes

- Strong starting ability
- Low self-discharge rate
- Long service life
- High safety standards

Applications

Suitable Applications

Automobiles, Tractors, Internal Combustion Engines
