

12V 150Ah Starting Lead-Acid Battery

This is a 12V 150Ah lead-acid battery. It is a starting-type battery designed for automotive applications requiring high current output.

Product Overview

High-Performance Starting Battery

This 12V 150Ah lead-acid battery is specifically engineered for starting applications, providing the high current output necessary for automotive and heavy-duty engines. Designed for reliability and durability, it serves as a robust power source for various vehicle types requiring consistent ignition performance. Its high capacity ensures dependable operation even in demanding environments.

Technical Specifications

Battery Type

Lead-Acid • Starting Type

Model Number	3QA-150
Voltage	12 V
Capacity	150 Ah

Applications

Intended Applications

- Automotive engine starting
- Heavy-duty vehicle ignition
- High-current output requirements
