

# 12V 200Ah Front Terminal Deep Cycle Gel Battery

This 12V 200Ah deep cycle gel battery is designed with front terminals for easy connection. It provides reliable power storage for solar and renewable energy applications, ensuring efficient energy management.

## ADDITIONAL IMAGES

## Overview

### High-Performance Deep Cycle Gel Battery

This 12V 200Ah front terminal gel battery is engineered for reliable power storage in solar and renewable energy applications. It features a robust construction designed to withstand shock and impact while maintaining consistent performance. With excellent resistance to over-discharge and overcharge, this battery ensures long-term durability and safety for demanding power requirements.

## Key Metrics

### Rated Voltage

**12 V**

Voltage

### Rated Capacity

**200 Ah**

Capacity

## Charging Specifications

### Charging Parameters

Usage Type	Voltage Range
Standby Use	13.5-13.8V
Cyclic Use	14.4-14.7V

  

Maximum Initial Charging Current	50 A
----------------------------------	------

## Performance Features

### High Current Performance

- Withstands 2 CA discharge for 5 minutes without deformation
- Withstands 10 CA discharge for 5 seconds without deformation

### Safety & Durability

Leak-proof, Shock-proof, Impact-resistant, Over-discharge resistant, Overcharge resistant
