

12V 200Ah Gel Battery for Solar/Wind Systems

This 12V 200Ah gel battery is designed for energy storage in renewable energy systems, such as solar and wind power. Its valve-regulated lead-acid (VRLA) design ensures a maintenance-free and spill-proof power solution.

Product Overview

High-Performance Energy Storage

This 12V 200Ah Gel battery is specifically engineered for reliable energy storage in solar and wind power systems. Designed as a valve-regulated lead-acid (VRLA) unit, it offers a maintenance-free and spill-proof solution for demanding renewable energy applications. It ensures consistent power output and longevity when operated within recommended environmental conditions.

Technical Specifications

Nominal Voltage	12 V
Rated Capacity	200 Ah
Model Number	6-CNF(J)-12
Battery Chemistry	Gel (VRLA)

Dimensions and Weight

Dimensions (L x W x H)	520 x 240 x 228 mm
Total Weight	57 KG

Compliance

Quality Certifications	ISO 9001, ISO 4001, CE
Production License	XK06-006-01308
