Product Overview

Renewable Energy Storage Solution

This 12V 200Ah lead-acid battery is engineered specifically for reliable energy storage in solar and wind power systems. Its robust design ensures performance in off-grid power solutions, making it an ideal choice for renewable energy infrastructure. The unit features built-in carrying handles and clearly marked terminals to facilitate safe and efficient installation.

Technical Specifications

Nominal Voltage	12 V
Rated Capacity	200 Ah
Model Number	6-CNFJ-200

Physical Dimensions

Dimensions (L x W x H)	520 x 240 x 228 mm
Weight	457 kg

Operating Requirements

Safety Instructions

- Read manual thoroughly before use
- Do not charge in airless or closed containers
- Prevent short circuits
- Do not disassemble or modify
- Avoid over-discharging

Optimal Operating Temperature	5°C to 40°C
-------------------------------	-------------

Certifications

Certifications

ISO 9001, ISO 4001, CE
