

12V 200Ah VRLA Battery

This 12V 200Ah VRLA battery is designed for applications needing consistent power. The sealed, maintenance-free design ensures safe operation in diverse environments.

Overview

High-Performance VRLA Power Storage

This 12V 200Ah Valve-Regulated Lead-Acid battery is engineered for reliability in diverse standby power environments. Its maintenance-free, sealed, and spill-proof design ensures safe operation while providing a high energy density for consistent power output. Ideal for mission-critical applications like UPS systems, solar power arrays, and emergency lighting, this unit offers robust construction for a long service life.

Technical Specifications

Performance Ratings

12 V Nominal Voltage	200 Ah Nominal Capacity
--------------------------------	-----------------------------------

Temperature Safety Limit	50 °C
--------------------------	-------

Compliance and Safety

Compliance Badges

CE • UL Recognized

Operational Warnings

- Do not throw into fire to avoid explosion
- Do not unscrew or disassemble any fitting parts
- Do not short battery terminals
- Do not charge in a sealed container
- Do not incinerate or heat above 50°C

Applications

Recommended Applications	UPS Systems, Emergency Lighting, Solar Power Systems, Standby Power
--------------------------	---
