

12V 200mA TV Connector AC Power Adapter

This AC adapter has an input voltage range of 100-240VAC at 50/60Hz. It delivers a 12VDC output at 200mA and is equipped with TV connectors.

Overview

Compact Power Solutions

This 12V DC power adapter provides a reliable and efficient energy conversion solution for TV and signal equipment. With a universal input range of 100-240VAC, it is engineered to handle fluctuations in power grids across different regions. The unit features a specialized TV connector interface, ensuring a secure and stable power connection for professional applications.
