

12V 300 PSI Portable Air Compressor

This compact 12V air compressor can deliver up to 300 PSI, suitable for inflating car tires and other inflatable items. It features an integrated pressure gauge for monitoring inflation levels and a compact design for easy storage in a vehicle.

Product Overview

Compact Emergency Inflation Solution

This 12V portable air compressor is designed for reliable automotive maintenance and emergency roadside assistance. Capable of delivering up to 300 PSI, it provides a powerful solution for inflating car tires and various inflatable items quickly. Its compact, space-saving design ensures it fits easily into any vehicle trunk, making it an essential tool for drivers.

Technical Specifications

Maximum Pressure

300 PSI
Max Pressure

Operating Voltage

12 V

Primary Application

Automotive Emergency, Tire Maintenance, Inflatable Items

Features

Key Features

- Integrated pressure gauge for inflation monitoring
- Compact design for vehicle storage
- 12V power compatibility
