Overview

High-Performance Deep-Cycle Power

This 12V 32Ah electric vehicle battery is engineered for reliability and consistent performance in demanding mobility applications. Designed for electric road cars, the unit offers a stable power output to ensure extended runtime and durability. Its robust construction makes it an ideal source of dependable energy for various electric transport solutions.

Technical Specifications

Nominal Capacity

32 Ah

Capacity

Nominal Voltage 12 V

Discharge Rate 10hr

Physical Attributes

Dimensions (L*W*H) 266*76*170mm

Weight 9.8 kg

Commercial Terms

Minimum Order Quantity 200 pcs

Production Time 8-10 days

Certification and Compliance

Certifications CE
