

12V 36Ah Automotive Starting Battery

This is a 12V 36Ah car battery designed for starting internal combustion engines. It features clearly marked upper and lower level indicators for electrolyte levels.

Product Overview

Reliable Starting Power

This 12V 36Ah automotive starting battery is engineered to provide consistent and reliable power for internal combustion engines. Designed for durability, the unit features a robust polypropylene casing and clear electrolyte level indicators for easy maintenance. It is an essential component for automotive applications requiring dependable starting performance.

Technical Specifications

Voltage	12 V
Capacity	36 Ah
Model Identifier	N36

Features

Maintenance Indicators	Yes
Casing Material	Polypropylene
Terminal Features	Color-coded, Polarity marked
