

12V 4A Slim Smart Battery Charger

This slim, compact smart battery charger is designed for 12V batteries. It features LED indicators for voltage selection and charging status and is equipped with a standard power cord and battery connection terminals for easy and secure attachment.

Product Overview

Smart Charging Technology

The PSL004 is a high-efficiency 12V, 4A slim smart battery charger featuring patented breakthrough technology. Designed to be super compact, this unit offers a significant upgrade over traditional bulky chargers. It supports fast, powerful charging while providing repair and maintenance modes to extend battery health, making it an ideal choice for long-term connection.

Technical Specifications

Ingress Protection

IP65

Output Voltage

12 V

Charging Current

4 A

Compatibility & Features

Compatible Battery Types

Lead Acid, Calcium, EFB, AGM
