

12V 50Ah Electric Scooter Lead-Acid Battery

This 12V 50Ah lead-acid battery provides reliable power for electric scooters. It delivers a large starting current, a long service life, and safe, dependable operation.

Product Overview

High-Performance Electric Scooter Battery

The 6-DZM-50 is a 12V 50Ah lead-acid battery specifically engineered for electric scooters and bicycles. It utilizes advanced Nano-Gel technology to deliver high energy density, excellent charge acceptance, and a low self-discharge rate. Designed for reliability, this battery features a robust copper-core terminal structure and a 100% recyclable, toxic-metal-free grid construction.

Technical Specifications

Voltage	12 V
Capacity	50 Ah
Model	6-DZM-50
Cycle Life	350 cycles

Key Features

Key Advantages

- Low self-discharge rate
- High energy density
- Fast charging time
- High starting current
- Anti-vibration capability

Safety & Reliability

No Acid Leaking • Toxic Metal Free • Nano-Gel Technology

Construction Materials

100% Recyclable, Pb-Ca Alloy, High Tin Alloy, Copper Core Terminal
