

12V 60Ah Lead-Acid Automotive Starting Battery

This 12V 60Ah lead-acid battery is designed for automotive starting applications. It provides reliable starting power for vehicles with its robust design and construction.

Product Overview

Reliable Automotive Starting Power

This 12V 60Ah lead-acid battery is engineered specifically for automotive starting applications, providing consistent and reliable ignition power. Built with a robust design, it is constructed to withstand the demanding vibrations and thermal conditions typical of daily vehicle operation. It serves as a dependable energy source for standard passenger vehicles requiring a 60Ah capacity.

Technical Specifications

Voltage

12 V

Nominal Voltage

Capacity

60 Ah

Rated Capacity

Battery Type

Lead-Acid • Automotive Starting

Model Identifier

6QA-60
