Product Overview

High-Performance AGM Battery

This 12V AGM motorcycle battery utilizes advanced oxygen recombination technology to deliver a maintenance-free, high-sealing solution for powersports vehicles. Engineered for superior vibration resistance and reliable starting power, it features a robust safety valve system and excellent temperature adaptability. Designed for long-term durability, it offers an economical power solution with low internal resistance and strong water regeneration capacity.

Technical Specifications

Maintenance

Maintenance-Free • Sealed Construction

Operating Temperature Range

-30 °C to 50 °C

Key Features

Oxygen Recombination, Anti-Shake Performance, Low Internal Resistance, High Sealing Efficiency

Available Models

Common Model Specifications

Model	Voltage	Capacity (10HR)
YB2.5-BS	12V	2.5Ah
YTX4L-BS	12V	4Ah
YTX5L-BS	12V	5Ah
YTX7L-BS	12V	6Ah
YTX12-BS	12V	10Ah

Compliance & Quality

Certifications

ISO 9001, ISO 14001, OHSAS 18001, CE, UL, IEC 61427
