

12V Alkaline 27A Battery

This 27A battery delivers 12 volts and features an alkaline chemistry for long-lasting power. It is ideal for remote controls, security systems, and other electronic devices requiring a compact, high-voltage power source.

Product Overview

High-Performance 12V Alkaline Power

This 12V 27A alkaline battery is engineered for specialized applications requiring compact, high-voltage power. Composed of 8 precision-assembled 1.5V LR732 cells, it delivers consistent energy for devices like remote controls and security systems. The formulation is fully compliant with global environmental regulations, featuring a 0% mercury design.

Technical Specifications

Nominal Voltage	12 V
Battery Type	Alkaline (Stack Battery)
Internal Composition	8 x 1.5V LR732 cells

Compliance & Safety

Mercury Content	0% Hg
Compliance	RoHS Compliant, Environmentally Friendly

Market Opportunities

OEM Capabilities	Available for joint-development of blister retail packaging
