

# 12V Alkaline Stack Battery

This 12V alkaline stack battery is designed for use in remote controls and car alarms. It provides long-lasting performance and stable voltage output for compatible devices.

## Product Overview

### High-Performance 12V Stack Battery

This 12V alkaline stack battery is engineered for reliable, high-voltage power delivery in compact electronic devices. Utilizing an advanced 0% mercury formulation, it meets strict international environmental regulations while providing stable voltage output. Designed for consistent performance, it is an ideal power solution for remote controls, security systems, and various small electronic applications.

## Technical Specifications

### Internal Composition

- 8 pieces of 1.5V LR932 cells
- 8 pieces of 1.5V LR732 cells

Voltage	12 V
Compatible Models	23A, 27A

## Compliance & Quality

### Mercury Content

0% Hg

Manufacturing Method	Machine-assembled
----------------------	-------------------

## Commercial

Services Available	OEM, Blister Retail Packaging
--------------------	-------------------------------
