

12V Automotive Battery Charger with Cigarette Lighter Adapter

This 12V battery charger is designed for automotive use. It connects via a cigarette lighter adapter and includes a charging indicator.

Product Overview

Reliable 12V Automotive Charging Solution

This automotive battery charger is designed specifically for 12V systems, offering a convenient way to manage battery maintenance. Featuring a simple connection via a cigarette lighter adapter, it is engineered to provide an essential starting charge for dead batteries. Its compact design and clear charging indicators make it a practical tool for vehicle owners and emergency roadside assistance.

Technical Specifications

Voltage Compatibility

12V

Model Number

GE-10

Connection Type

Cigarette Lighter Adapter
