

# 12V Cordless Drill Driver with Step Speed Control

This 12V cordless drill driver is designed for a variety of drilling and driving tasks. It features a lithium-ion battery for extended runtime and consistent power, along with step speed control for precision.

## ADDITIONAL IMAGES

## Overview

### Professional Cordless Performance

This 12V cordless drill driver is engineered for versatility and reliability in various drilling and driving applications. Featuring a high-efficiency lithium-ion battery system, it provides extended runtime and consistent power delivery for demanding tasks. The ergonomic design, coupled with a convenient belt clip, ensures comfort and portability for high-altitude operations or extended work sessions.

## Technical Specifications

Voltage	12 V
Battery Technology	Lithium-ion
Gearbox	Two-speed powder metallurgy

## Key Features

### Key Features

- Built-in LED work light
- 1-hour quick charge capability
- Battery capacity indicator
- Short-circuit protection
- Spindle lock for easy bit changes
- Belt clip for portability
