Product Overview

Professional Cordless Performance

This 12V cordless drill driver is engineered for versatility and reliability in various drilling and driving applications. It features a high-performance two-speed powder metallurgy gearbox and variable speed control, allowing for precise adjustments across different materials. Designed for professional use, the tool incorporates a lithium-ion battery system that ensures longer run times and quick charging, making it an efficient choice for demanding tasks.

Technical Specifications

Voltage	12 V
Battery Technology	Lithium-ion
Quick Charge Time	1 hour

Key Features

Core Features

- Built-in LED work light for dark areas
- Two-speed powder metallurgy gearbox
- Automatic battery ejection function
- Belt clip design for high-altitude operation
- Short-circuit protection
- Battery capacity indicator

Operational Benefits	Variable Speed, Compact Design, Ergonomic, Lightweight
