

12V Cordless Tire Inflator

This cordless mini air compressor is powered by a 12V source. Its compact design makes it easy to store and transport for inflating tires, sports equipment and more.

Overview

Portable Inflation Solution

The 12V Cordless Mini Air Compressor is a versatile and portable tool engineered for efficient tire and equipment inflation. Designed for convenience, its cordless operation eliminates the need for external power outlets, making it an essential companion for roadside emergencies, camping, and general maintenance. This compact unit is equipped to handle various inflation tasks, including car and bicycle tires as well as sports equipment.

Technical Specifications

Voltage	12 V
Maximum Pressure (Bar)	9 bar
Maximum Pressure (PSI)	130 PSI

Features

Key Features
