

12V Lead-Acid Battery

This high-performance 12V lead-acid battery is designed for various applications. It features robust construction and delivers reliable power.

Overview

High-Performance 12V Lead-Acid Battery

This high-performance 12V lead-acid battery is engineered for reliable power delivery and robust construction. Designed specifically for deep cycle applications, it ensures consistent power output across various demanding environments. It serves as an ideal energy solution for automotive, marine, and industrial use cases.

Technical Specifications

Battery Type

Lead-Acid • Deep Cycle

Voltage

12 V

Model Number

6-QA-150T

Suitable Applications

Automotive, Marine, Industrial
