

# 12V Lead-Acid Car Battery

This lead-acid car battery provides reliable starting power for vehicles. It is constructed with multiple cells and vents for enhanced safety and designed for 12V systems.

## Overview

### Reliable 12V Automotive Power

This 12V lead-acid battery is engineered to provide dependable starting power for automotive applications. Featuring robust construction with multiple cells and integrated safety vents, it ensures consistent performance and durability. Designed for standard 12V vehicle electrical systems, it offers a reliable 36Ah capacity to meet essential starting requirements.

## Technical Specifications

Rated Voltage	12 V
Rated Capacity	36 Ah
Battery Chemistry	Lead-Acid

## Features

### Key Features

- Robust multi-cell construction
- Integrated safety venting system
- Standard automotive terminal configuration
- Optimized for 12V vehicle systems

### Compliance & Standards

12V System • Automotive Grade
