

12V Lead-Acid Car Battery

This is a 12V lead-acid battery for automotive applications. It features a robust design with clearly marked terminals.

Product Overview

Reliable 12V Lead-Acid Power

This high-performance 12V lead-acid battery is engineered for reliable automotive starting power. Designed with a maintenance-free structure, it ensures long-term convenience and consistent performance for daily vehicle operations. The unit features clearly marked terminals for safe and efficient installation, making it a robust choice for standard automotive applications.

Technical Specifications

Maintenance

Maintenance-Free

Terminal Identification

- Positive (Red)
- Negative (Blue)

Voltage

12 V

Battery Type

Lead-Acid
