

12V Portable Air Compressor with Integrated Gauge

This compact 12V air compressor is designed for inflating tires and other inflatable items. It features an integrated pressure gauge for monitoring inflation levels and is suitable for car use.

Product Overview

Compact Roadside Solution

This portable 12V air compressor is designed for efficient tire inflation and general-purpose pneumatic needs. Engineered for reliability during emergency roadside assistance, it features a compact form factor that ensures easy storage in vehicle trunks. With an integrated pressure gauge, users can monitor inflation levels in real-time, ensuring optimal pressure for safety and performance.

Performance Specifications

Maximum Pressure

300 PSI
Max Pressure

Power Source

12V DC

Features

Typical Applications

- Tire inflation
- Emergency roadside assistance
- Inflatable items

Key Features

Integrated Gauge, Portable Design, Emergency Ready, 12V Operation
