

12V Rechargeable Fan with Solar Panel

This rechargeable fan offers portable cooling and includes a solar panel for power. The fan features a standard blade design, central control panel, and stable base.

Product Overview

Sustainable Cooling Solution

This 12V rechargeable fan is designed to provide reliable cooling in areas with limited or unstable access to the electrical grid. Equipped with a dedicated solar panel, it offers an off-grid charging capability that ensures operation even in remote locations. The unit features a robust design with a stable base and a user-friendly central control panel for seamless speed adjustments.

Technical Specifications

System Voltage	12 V
Power Source	Solar Power, Rechargeable Battery
