

12V/24V Halogen Rotating Warning Light

This rotating warning light operates on either 12V or 24V power systems. It utilizes a halogen bulb and rotating beacon to provide a highly visible warning signal.

ADDITIONAL IMAGES

Product Overview

Rotating beacon designed for mining and construction safety.

Industrial Rotating Beacon

This high-visibility rotating warning light is engineered for demanding industrial and mining environments. Compatible with both 12V and 24V electrical systems, it utilizes a powerful halogen H1 bulb to deliver a bright, revolving signal that ensures maximum hazard awareness. Built with a durable ABS base and a resilient PS cover, it provides reliable performance under challenging conditions with an IP65 waterproof rating.

Technical Specifications

Engineered for easy installation and maintenance in industrial settings.

Ingress Protection

IP65

Voltage

12V / 24V

Bulb Type

Halogen H1

Construction

Durable construction built to withstand demanding environments.

Construction Materials

PS Cover, ABS Base

Warranty & Support
