Product Overview

Versatile Cooling Solution

This portable DC air conditioner is engineered for off-grid environments, offering reliable cooling performance for vehicles, camping setups, and small mobile spaces. Operating on flexible 12V or 24V DC power, it provides a compact and efficient solution for temperature control. Beyond cooling, the unit integrates multi-functional features like LED lighting, Bluetooth audio, and device charging, making it an ideal companion for travel and outdoor living.

Technical Specifications

Power Input	12V / 24V DC
Rated Power	230 W
Cooling Capacity	1000 btu/h
Refrigerant	R134a

Features & Functionality

Integrated Features	Fan Mode, Bluetooth Speaker, LED Light, USB Charging Port
USB Charging Output	5V / 2.1A

Safety & Maintenance

Safety Protections

- Automatic shut-off (Water tank full)
- Automatic shut-off (Excessive drainage required)
