

12V/6V Portable Battery Charger

This portable battery charger is designed for both 12V and 6V batteries. It features selectable 12/6/2 Amp charging rates, a display panel, and voltage selection switches.

Overview

Versatile Portable Charging Solution

This portable battery charger is designed to support both 6V and 12V battery systems, offering flexible charging rates of 12A, 6A, and 2A to suit various maintenance and charging needs. Equipped with a clear display panel and intuitive voltage selection switches, it provides users with precise control over the charging process. It is a reliable solution for diverse applications requiring portable power management and monitoring.

Technical Specifications

Charging Rates

12 A High Charge	6 A Medium Charge	2 A Trickle Charge
----------------------------	-----------------------------	------------------------------

Supported Voltages

6V, 12V

Features

Interface & Controls

- Integrated display panel
- 6V/12V voltage selection switch
- Charging mode selection switches
- Charge status indicators
