Product Overview

Reliable Power for Surveillance

This 12VDC switch-mode power supply is engineered specifically for CCTV camera systems, offering stable power delivery for up to 4 individual channels. Housed in a durable metal enclosure with a lockable door, it ensures both physical security and protection for your surveillance infrastructure. The unit is designed for continuous indoor operation and includes built-in safety features like short circuit and overcurrent protection.

Technical Specifications

Total Output Current

5 A

Rated Current

Input Voltage Range	100-120VAC / 200-240VAC
Input Frequency	50/60Hz
Output Voltage	12 VDC
Output Channels	4

Safety & Protection

Protection Mechanisms	Short Circuit Protection, Surge Protection, Overcurrent Protection, Overvoltage Protection
Output Safety	Individual fuses for each output channel

Physical Design

Security Features

- Lockable door
- Screw terminals for secure wiring
- Knockouts for cable management
- Ventilation slots for cooling

Environment

Indoor Use • Continuous Operation

Enclosure Material

Metal
