Product Overview

High-Efficiency LED Illumination

These 12W LED light bulbs are engineered with a unique radiator structure for superior heat dissipation and long-lasting performance. Designed as an eco-friendly replacement for traditional lighting, they offer significant energy savings and flicker-free operation to protect eye health. With a robust lifespan exceeding 20,000 hours and a wide operating temperature range, these bulbs provide a reliable, low-maintenance lighting solution for both residential and commercial environments.

Performance Metrics

Power Consumption

12 W

Rated Power

20000 hours

Lifespan

Operating Temperature Range

-40°C to 50°C

Technical Specifications

Color Temperature Range

2000K - 8000K

Dimming Capability

Dimmable, Non-dimmable

Key Features

Core Advantages

- Energy saving: Up to 90% more efficient than incandescent
- Flicker-free: No strobe effect for eye protection
- Eco-friendly: Lead-free, no heavy metals, no UV/IR radiation
- Wide voltage compatibility
- Insect repellent: Does not attract mosquitoes due to lack of UV
