

13 HP Gasoline Engine for Power Equipment

This 13 HP gasoline engine is designed for generators and other power equipment. The engine is a single-cylinder, four-stroke model suited for small to medium-sized power applications.

Product Overview

High-Performance 13 HP Engine

This robust 13.0 HP gasoline engine is engineered for reliable performance in demanding power equipment applications. Designed as a single-cylinder, four-stroke model, it provides consistent power output suitable for generators and medium-duty machinery. Its compact, durable construction makes it an ideal choice for professional power solutions.

Technical Specifications

Power Output

13 HP

Rated Power

Engine Type

Single-cylinder, four-stroke

Safety and Compliance

Safety Warnings

- Engine exhaust emissions are hazardous
- Do not use indoors
- Ensure adequate ventilation

Key Features

Design Highlights

Air Cleaner Assembly, Integrated Fuel Tank, Manual Control Levers
