

13 HP Single-Cylinder Gasoline Engine

This is a 13.0 HP single-cylinder gasoline engine. It is a four-stroke engine designed for various applications such as generators, water pumps, and other power equipment.

Overview

High-Performance 13 HP Gasoline Engine

This robust 13.0 HP single-cylinder gasoline engine is engineered for versatility and reliability in demanding environments. Featuring a classic four-stroke design, it serves as an ideal power source for a wide range of industrial and commercial equipment, including generators, water pumps, and construction machinery. Its efficient cooling system and durable construction ensure consistent performance during extended operation.

Technical Specifications

Rated Power

13 HP

Horsepower

Engine Type	Single-Cylinder, 4-Stroke
Fuel Type	Gasoline

Features & Compatibility

Common Applications

- Generators
- Water Pumps
- Construction Equipment
- General Power Tools

Design Highlights	Air-Cooled, 4-Stroke Cycle, Industrial Grade
