

132 kV High-Voltage Oil-Filled Power Cable

This high-voltage oil-filled cable is designed for 132 kV power transmission. It is insulated with oil and paper to ensure reliable performance and a long lifespan.

Product Overview

High-Performance 132 kV Power Transmission

This high-voltage oil-filled cable is specifically engineered for 132 kV power transmission projects, providing reliable performance in demanding electrical environments. Utilizing advanced oil and paper insulation technology, it is designed to withstand high electrical stresses and varying environmental conditions. This solution is ideal for large-scale infrastructure projects, such as the Kuwait AHMADI substation, ensuring efficient and long-lasting power delivery.

Technical Specifications

| | |
|-----------------------|---|
| Voltage Rating | 132 kV |
| Insulation Material | Oil-Filled Paper Insulation |
| Suitable Applications | Substation Infrastructure, High-Voltage Transmission, Foreign Engineering Contracts |

Project Context

| | |
|-------------------|--------------------------|
| Reference Project | Kuwait AHMADI Substation |
