Product Overview

High-Performance Diesel Engine Piston

This 133mm diesel engine piston is engineered specifically for Detroit Series 60 14L engines, offering robust construction for demanding industrial and automotive applications. Designed to withstand extreme temperatures and pressures, it features precision-machined ring grooves for effective sealing and oil control. This component ensures optimal combustion efficiency, reduced emissions, and extended engine service life.

Technical Specifications

Piston Diameter	133 mm
OE Number	23533594
Engine Model	S60

Compatibility & Usage

Suitable Applications	Heavy Truck, Excavator
