Product Overview

High-Performance Metal Cutting Solution

This 14-inch abrasive cut-off wheel is engineered for professional metal fabrication, construction, and maintenance tasks. Designed for high efficiency and durability, it delivers fast, clean cuts with minimal burr formation on both ferrous and non-ferrous metals. The disc features a reinforced bonding matrix for extended service life and consistent performance in demanding industrial environments.

Technical Specifications

Maximum Operating Speed

4300 RPM
RPM

80 m/s
Max Peripheral Speed

Safety Compliance

EN12413

Diameter	355 mm
Thickness	3.2 mm
Arbor Size	25.4 mm

Compatibility & Usage

Compatible Machinery

- Gas Saw
- Chop Saw

Material Application	Ferrous Metals, Non-Ferrous Metals
