

14-inch Metal Cutting Disc

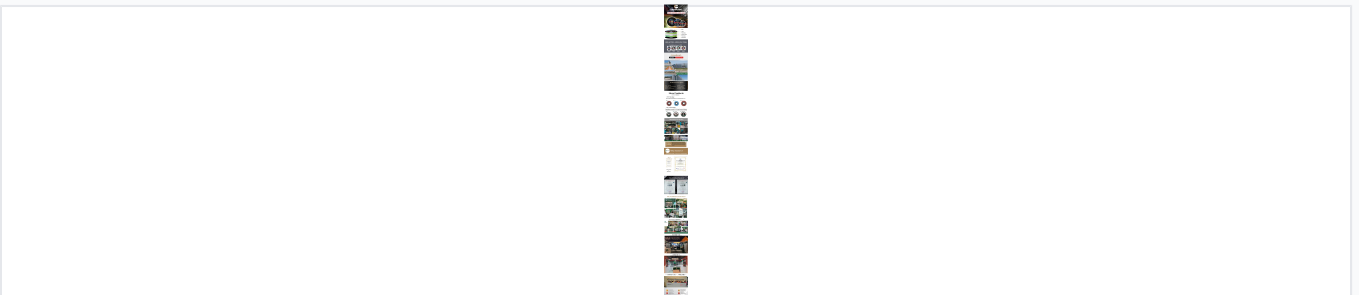

This 14-inch cutting disc delivers fast and comfortable cuts with long-lasting performance. It is ideal for metal fabrication, maintenance repair, and general industrial applications.

ADDITIONAL IMAGES

Overview

Engineered for precision cutting, long life, and superior abrasive performance across various metal and industrial applications.

Professional Grade Metal Cutting Disc

These high-performance cut-off wheels are engineered for professional metal fabrication and industrial maintenance. Designed to deliver fast, comfortable cutting with exceptional longevity, they provide significant performance advantages over standard abrasive products. Each wheel features reinforced fiberglass construction to ensure maximum safety and durability during demanding surface preparation and cutting tasks.

Technical Specifications

Performance Metrics

80 m/s

Max Operating Speed

4400 RPM

Maximum R.P.M.

Abrasive Specifications

Feature	Detail
Abrasive Material	Aluminum oxide
Hardness	R Grade
Grit Size Options	24#, 30#, 46#, 60#
Reinforcement	Reinforced fiberglass

Compliance and Quality

Certifications

MPA EN12413, ISO9001, ISO14001, OHSAS18001
